

## KEEP YOUR WOOD FLOOR IN TIP-TOP CONDITION FOR LONGER

Quickly remove dust, small stones and sand from your floors to prevent scratches. Mop up liquids on the floor immediately to prevent dark spots. Avoid using too much water to clean and care for your floors to prevent swelling and discoloration. Damp-cleaning with the LOBA Mop or Spray Mop is ideal. Regularly clean and care for your floors to preserve their beauty for longer. Always read the cleaning and care instructions provided by the floor manufacturer.

### FLOOR MATS

Use suitable floor mats at all external doors. Dirt-trapping mats are ideal for outside, while anti-dirt mats. Avoid using too much water to clean and care for are ideal for inside.

### FURNITURE PROTECTORS

Attach felt pad sliders to your furniture to prevent scratches. Regularly check the felt for small stones or grains of sand and remove them. If you use furniture with wheels (e.g. office chairs), protect your floor with suitable underlays.

### DISCOLORATION FROM CHEMICALS OR MOISTURE

Never use plasticizer-containing materials on your flooring, as they cause softening and discoloration of your surfaces. Hair dyes and rubber tires on wheelchairs and bicycles lead to permanent, irreversible discoloration. Gray-black discoloration and swelling are caused most often by incorrect cleaning of floors, mostly using too much water. This results in gray-black discoloration, often with swelling.

### ROOM CLIMATE AND NATURAL DISCOLORATION

Interior climate conditions with approx. 50 % relative air humidity at 20° C are ideal both for wood floors and for your own well-being. So use humidifiers on your radiators and ensure that the room has a sufficient number of green plants. Natural discoloration from UV rays: Wood is a natural product, and the color of even finished wood changes over time as a result of exposure to daylight.

## WHEN YOU'RE IN A RUSH – USE LOBA SPRAY MOP SET

The LOBA Spray Mop is a practical mop with an integrated spray system. You can use it to clean all water-resistant floors easily and conveniently:

- HARDWOOD FLOORS
- CORK FLOORS
- TILE AND STONE FLOORS
- LAMINATE
- PVC, LINOLEUM, RUBBER AND DESIGN FLOORING

The Spray Mop is inexpensive and environmentally friendly, thanks to the use of cleaner concentrate and operation without a battery or electricity. The microfiber Mop Pad is easy to remove and can be washed at 60° C without softener.

# YOUR HOME OUR PASSION

## FLOORS NEED LOVE!

LOBA helps you maintain the beauty of your floor. For over 100 years we have been the specialist for the sustainable renovation, cleaning, and care of your floors. Discover our innovative and high quality products!

## WHICH PRODUCT SHOULD YOU USE?

If you are not sure whether your floor is finished or oiled | waxed, just ask your landlord, a hardwood floor / flooring installer or the last handyman who worked on the surface. In the meantime, you can use our LOBA Universal Cleaner for all water-resistant surfaces without any concerns.

## HOW OFTEN?

How often a floor needs cleaning and care depends on the level of use and how dirty it is. Our recommendation is therefore intended as a guide.

3+1

## OUR RECOMMENDATION

Use our care products after every third cleaning. This not only cleans the surface but also applies a protective care film.

## CLEANING

**CLEANER for finished HARDWOOD FLOORS** and all finished wood surfaces

**CLEANER for oiled | waxed HARDWOOD FLOORS** and all oiled | waxed wood surfaces

**UNIVERSAL CLEANER CONCENTRATE** for all water-resistant surfaces

## Maintenance cleaning Once a week

- For cleaning, add 50 ml LOBA Cleaner concentrate to 5 liters of water.
- Damp-wipe your surface with this cleaning solution using the LOBA Mop.

## Intensive cleaning For heavy soiling

- For more intensive cleaning, add 250 ml LOBA Cleaner concentrate to 5 liters of water.
- Damp-wipe the surface evenly using the LOBA Mop. Wipe a second time with clean water to neutralize.

Once completely dry, apply LOBA Care concentrate to finished and oiled | waxed floors for intensive care to protect the floor from micro-scratches and wear.

## CARE

**CARE for finished HARDWOOD FLOORS** and all finished wood surfaces

**CARE for oiled | waxed HARDWOOD FLOORS** and all oiled | waxed wood surfaces

**CARE FOR RESILIENT FLOORING** like vinyl, LVT, PVC, design flooring and linoleum

## Maintenance care Once a month

- For maintenance care, add 50 ml LOBA Care concentrate to 5 liters of water.
- Damp-wipe your wood surface with this care solution using the LOBA Mop.

## Intensive care After intensive cleaning

- For more intensive care, carry out intensive cleaning first. Then add 250 ml Care concentrate to 5 liters of water.
- Damp-wipe your wood surface evenly using the LOBA Mop.

Once it is completely dry, the floor is optimally protected from micro-scratches and wear.

## SPOT CLEANING

**UNIVERSAL CLEANER SPRAY**  
Ready-to-use universal cleaner for all water-resistant surfaces

## Interim cleaning For small areas

- Spray the area to be cleaned in sections with the ready-to-use LOBA Universal Cleaner Spray.
- You can now wipe the damp surface using a microfiber / cotton cloth or the LOBA Mop.
